DETAILS OF COURSE AND LOOPS

The Namib Desert, surrounding Walvis Bay, is one of the oldest deserts in the world, and the Walvis Bay ride takes the endurance rider over some of the highest dunes in the world. This ride is not only one of the most spectacular in Africa, but also an endurance ride in the true sense of the word. Rider and horse have to endure all aspects of the vastness and solitude of the Namib Desert.

The Walvis Bay lagoon is the largest single area of shallow water, on the west coast of Africa. Its natural beauty is highlighted by the presence of thousands of birds throughout the year, most notably flamingoes. The lagoon, a Ramsar site because of its value as a wetland area is home to thousands of bird species.

With the cold Benguela current running along this coast temperatures can vary from very cold to very hot, with occasional desert winds.

**LOW TIDE IS AT 06:54. HIGH TIDE IS AT 13:16
SUNRISE IS AT 06:14. MOONSET IS AT 04:22**

There will be distance indicators every 10 km and there will be water points at least every ten kilometers on the course. Grooming will be allowed at designated water points on the course on the condition that horses will have right of way on the course and groom teams at the water points may not use any of the water of the provided water point. This is very important because should groom teams make use of the water provided at the water point, it could result in a situation where there will not be sufficient water for the horses.

We further request the groom teams to keep a radius of at least ten meters around the water point clear for riders and horses. Grooming is only allowed at certain points on the course and will be explained at the route briefing.

FOR FULL DETAILS REGARDING THE COURSE PLEASE STUDY THE MAPS AND FACT SHEETS ON THE WEB.
